

**Neighborhood environments and healthy life expectancy in older adults: a six-year longitudinal cohort study based on data from the Japan Gerontological Evaluation Study**

**Supplementary Materials**

Supplementary Table 1. Association between neighborhood park availability and physical activity in men

	Physically active		Physically inactive		p
	n	%	n	%	
Strenuous exercise					
Park in the neighborhood	613	20.49	2378	79.51	<.0001
No park in the neighborhood	149	15.62	805	84.38	
Moderate activity					
Park in the neighborhood	1949	62.57	1166	37.43	<.0001
No park in the neighborhood	525	53.19	462	46.81	
Light activity					
Park in the neighborhood	2041	67.36	989	32.64	<.0001
No park in the neighborhood	525	55.03	429	44.50	

Note: Excluding no answers

Supplementary Table 2. Association between neighborhood park availability and physical activity in women

	Physically active		Physically inactive		p
	n	%	n	%	
Strenuous exercise					
Park in the neighborhood	560	19.89	2255	80.11	<.0001
No park in the neighborhood	155	14.21	936	85.79	
Moderate activity					
Park in the neighborhood	1861	62.49	1117	37.51	<.0001
No park in the neighborhood	588	51.76	548	48.24	
Light activity					
Park in the neighborhood	2670	87.51	381	12.49	<.0001
No park in the neighborhood	886	75.86	282	24.14	

Note: Excluding no answers
