(B)

Supplementary Figure S1. Patient data directly before the initiation of hemodialysis.

(A) Electrocardiogram (ECG). The ECG shows no significant abnormalities. (B) Chest X-ray. The radiograph shows no obvious infiltrative shadow or consolidation. (C) Venous blood gas analysis. The results include pH, pCO₂, pO₂, HCO₃⁻, lactate, and serum electrolyte levels (Na⁺, K⁺, Cl⁻, etc.).
